

Kim Yuen

A *front end web developer* with an appetite for growth.

From the moment I produced “Hello World” in the console of my first application, I knew I was hooked into the world of software development. But software development has never been “just a job” for me, it’s offered an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple “Hello World” has become a full-fledged passion that only gets more exciting as the years go by.

EXPERIENCE

VIBROFLOW MACHINERY SEARCHER

A database of vibratory machinery that enables users to easily search for machinery by filtering via the machinery’s features.

Uses React, JavaScript, Tailwind CSS

LUCKY START CHINESE WEBSITE

A modern and blazing fast website for a local Chinese takeaway joint called Lucky Start. The website was built with Gatsby and the data was sourced from a REST API.

Uses React, Gatsby, GraphQL, Sanity, styled-components, JavaScript
